Nurse Educators must prepare pre-licensure students for the complex, rapidly changing healthcare environment in which they will work after graduation. This includes preparation for the Registered Nurse (RN) licensure examination (NCLEX-RN). Educational Products are available that include teaching resources that help prepare students for the NCLEX-RN examination. These products help reinforce content knowledge and development of skills in clinical decision-making, critical thinking, communication and leadership. In addition, tools allow for formative and summative evaluation of students’ NCLEX-RN Readiness.

Student success in passing the NCLEX-RN examination is required for graduates to enter the workforce as Registered Nurses. First-time pass rates are used by state regulatory bodies as well as credentialing agencies to rate RN program quality. These products are effective in promoting student success, but are cost-prohibitive. California State University (CSU) Pre-Licensure Nursing programs utilize some type of RN licensure test prep products; however not all campuses have access to all of these resources due to high costs. The purpose of this proposals is to explore affordable teaching and RN licensure resources available to procure the best option(s) for our students.
